

Cleaning Services Offered

Cleaning

Cleaning of all types of buildings, stone, brick, terracotta, concrete etc. Removal of paint and graffiti.

Anti graffiti systems without damaging the surface

A complete range of safe, efficient, cost effective and environmentally friendly products designed to wipe out existing graffiti and protect surfaces from future attacks.

Protecting

Once the surfaces are clean they can be kept that way with the range of anti graffiti protective products. There are two approaches to graffiti protection:-

Sacrificial system:

products which coat surfaces and which wash away easily with hot water only, taking graffiti with them. The product must then be re-applied.

Permanent system:

products which coat and seal surfaces. Paint and ink will not penetrate this coating, so graffiti can easily be cleaned off using a graffiti remover, leaving the protective coat intact.

TORC

DOFF

A History of Cleaning at CWO

Following the formation of the company in 1966, CWO has been routinely occupied with the cleaning of a tremendous range of projects spanning from half day cleaning of private gravestones right up to large-scale, cleaning contracts of well-known historic, public and commercial buildings, including:

- ♦ Chichester Cathedral
- ♦ South Steps, Royal Albert Hall
- ♦ Guildhall, London
- ♦ Inner Temple, London
- ♦ St John's R.C. Cathedral, Portsmouth
- ♦ King Alfreds College, Winchester
- ♦ Vulcan Building Naval Base, Portsmouth

Mansion House, London

Restoration Cleaning Techniques

The range of techniques employed in restoration cleaning has evolved and refined over time. At CWO in-house expertise in the traditional range of cleaning techniques has been supplemented with on-going training in the latest cleaning developments.

As a result CWO are able to offer a consistently high standard of cleaning services across a wide range of techniques including:

- ♦ JOS (swirling vortex cleaning Torc System)
- ♦ DOFF (high pressure steam cleaning)
- ♦ Tensid UK anti graffiti system
- ♦ Graffiti removal
- ♦ Paint removal
- ♦ Poulticing
- ♦ Chemical cleaning
- ♦ Flood cleaning

An approved agent for the JOS (Torc) and DOFF systems, CWO are also able to carry out chemical cleaning where necessary (under strictly controlled conditions) and use nebulous sprays or straight-forward water cleaning.
